NERD MAN

Newsletter September 2011

Recap From Last Time

I.T Waste: Be responsible and take your IT waste to council recycling places or place that fix and resell

Home-based businesses: You can have home and Business I.T resource sharing.

Data Backups: ensure that your data backup is done regularly.

This Month

PC Faxing:

What is it; well let me tell you, instead of printing and then faxing and then throwing away the printed copy you can fax direst from the computer to a PC-Fax enabled multifunction centre or to your internal fax modem if you have the software.

Most new multifunction centre have PC-Faxing faculties, and the software is included with your Unit.

Fax Modem are a bit old fashion for internet communication but still used for faxing, Windows 7, Vista and some versions of XP have the software build in.

Now how…. simply print you document as normal, instead of selecting the printer select the Fax unit. The names will vary depending on the multifunction centre manufacturer, but general you will see the word FAX in the name.

This will save time and money in faxing….If you need help setting things up *call* NERD MAN.

I.T Box:

This is a box with all your I.T stuff like cable, plugs, a mouse, keyboard, CD's for printers, computers, and other software. So when You or I need something it's easy to find.

Why cables to, well some time a cables may go faulty.

If you don't know what to keep, put it all in and next time I'm around we can sort it out.

Printing From Iphones & Ipads & Android Phones:

Yes you can do this, you there are a number of apps that will help, some are free and so you have to pay for, find an app that will allow you to do the type of printing you want and then install.

There are some free ways of doing it but they can get a bit techie…

Backuped data save employee pain…..

Well while the boss is away OS a stressed out employee call with the a problem, instead of renaming a file she deleted it….as the file is located on a remote file server it didn't go in the recycle bin. Luck the Boss listened to her Nerd and had an online backup solution in place….File was restored in 10 minutes and employee happy….What a pain it would be to re-enter a heap of data in again before the boss came home….
